

# Clinical-Quality Animal Tissue

## for Pre-Clinical Trials - Product Testing - R & D

**Why do you need Veterinary Transplant Services (VTS)?** Because VTS is a professional tissue bank with experience in procuring, processing and testing tissues for implantation. Investing in quality products in the initial project design phase can prevent costly rework in later phases of your project.

Here is what you may be missing, if you acquire animal tissue from another source rather than from VTS:

Compare for yourself:	Other Sources	VTS
<b>Processed to tissue banking standards</b>	?	✓
<b>Clinical-quality</b> backed by established and validated SOPs and other Quality Systems elements	?	✓
<b>Consistent</b> tissue product characteristics within and across production batches	?	✓
<b>Sterility</b> assured, if needed	?	✓
<b>Osteoinductivity</b> assured, if needed	?	✓
<b>Guaranteed</b> to have other desired attributes as needed such as certain structural features and more	?	✓
<b>Allograft, not xenograft:</b> Using same-species-tissue in your research and pre-clinical trials eliminates variables and uncertainties associated with using cross-species tissue.	?	✓
<b>No trial and error:</b> Professional tissue banking experience contributes to consistent and reliable results.	?	✓
<b>You are first priority:</b> Animal tissue is all we do here at VTS, which means your animal tissue project will be first priority to us, not second or third priority.	?	✓
<b>Documentation:</b> We provide Certificates of Compliance and traceability documentation for all products and can provide additional detailed documentation upon request.	?	✓
<b>On time and on budget:</b> Avoid re-scheduling and re-budgeting headaches. We know in advance how long a tissue procurement and processing project takes and we deliver on time and on budget.	?	✓

Save time and money by getting it right the first time!
