

*Options for Raffles: remove non-union & significantly shorten limb  
Or replace non-union section with allograft section.*

**Pre-op**

**Immed. Post-op**

**6 weeks Post-op**

Per Dr. Gilbert:  
"Raffles made an excellent full recovery. I radiographed the fracture site/graft regularly and have a nice series showing progress, and had him back earlier this year for a 1 year follow up.  
  
The dog has returned to competitive agility work to my knowledge. Many thanks, and thanks too, to Ken [Greenwood] for his advice."

**12 wks post op**

**19 wks post op**

**36 weeks post op (9 mos)**
