

# Specialty Bone Grafts for Neuro

## Blocks, Cortical Segments, and More!

- **Cancellous Blocks<sup>1</sup>**

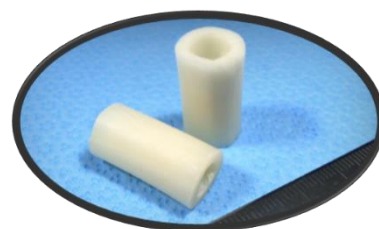

Made of dense cancellous bone typically found in the condyles and plateaus of femur and tibia

- **Cortical Segments<sup>2</sup>**

Made of cortical bone from either femur, tibia, or radius ring sections

- **Cortical Struts & Matchsticks**

Longitudinal sections of cortical bone from canine tibia, radius, or femur with a flat to semi-round cross-section

### Advantages

- ✓ Not generally available as autograft
- ✓ Available in different specialty shapes and sizes
- ✓ Can be trimmed to fit recipient site.
- ✓ Biological repair – fuses with, and eventually replaced by, the recipient's own bone
- ✓ Proven technology<sup>1,2,3</sup>

### Common Applications

Spinal fusions  
Void filling  
Bone loss  
Buttressing  
Bridging
